

Care Connector

Better care through
better connections

Your coaching and care teams operate at a high standard. At the same time, they're constrained by finite capacity and the challenge of matching member outreach precisely with member readiness to engage. Vitality's Care Connector pairs with the wellbeing platform to act as an extension of your coaches and care teams, scaling their reach and amplifying their impact.

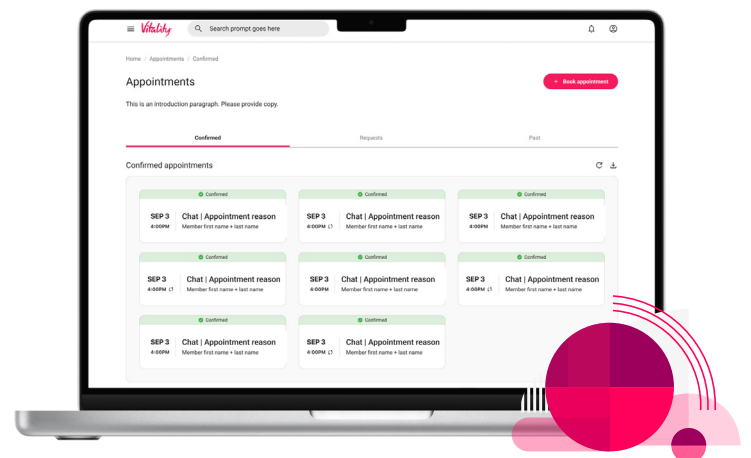

For members

Care Connector is fully integrated with our core platform, enabling members to use the Power of Vitality app or website to manage appointments easily, consult with their care team and engage in tailored activities assigned to them during their appointment. Care Connector's tools equip care teams to send recommendations directly to the member's home page for easy access, resulting in a more connected and personalized healthcare experience.

For clients

The integration of Care Connector enhances member awareness of your coaching and care solutions. This awareness leads to improved engagement in your solutions and optimizes additional targeted benefit offerings, ensuring full alignment with your overall incentive and communication strategies.

The result? Engagement where it matters most — at the intersection of wellbeing and care.

We make people healthier,
one behavior change at a time.
